List of Tables ................................................................................................................. VI

Abstract ........................................................................................................................... VIII

Chapter 1. Introduction ................................................................................................. 1

  1.1 Motivations of the study ....................................................................................... 1
  1.2 Objectives of the study ....................................................................................... 5
  1.3 Chapter outline .................................................................................................... 6

Chapter 2. Previous Studies of Economic Announcement Impact and the Accuracy of
          IEA’s Reports ........................................................................................................ 7

  2.1 The impact of economic announcements .......................................................... 7
  2.2 The empirical literature regarding the accuracy of IEA ........................................ 8

Chapter 3. Data and IEA’s Reports ............................................................................. 10

  3.1 Description of IEA’s report ................................................................................ 10
  3.2 Oil price data ..................................................................................................... 15

Chapter 4. Methodology ............................................................................................. 16

  4.1 Event study methodology .................................................................................. 16
    4.1.1 The mean adjusted model ......................................................................... 16
    4.1.2 The market model ..................................................................................... 18
  4.2 Cross-sectional regressions .............................................................................. 20

Chapter 5. Empirical Results ..................................................................................... 21

  5.1 Event study analysis ......................................................................................... 21
    5.1.1 Complete Samples .................................................................................... 21
List of Figures

Figure 1-1 Annual Average Crude Oil Price of WTI for the 1976-2006 Period……………1
Figure 1-2 Annual Growth of Oil Consumption...........................................................2
Figure 1-3 Annual Growth of Oil Production...............................................................3
Figure 3-1 IEA’s Framework for Developing its Historical World Oil Market Statistics.13
Figure 5-1 The Standardized Abnormal Returns and Cumulative Abnormal Returns for
    from 1990 to 2005 on IPE Brent Crude Futures.........................................................23
Figure 5-2 Average Oil Production and Consumption for Japan, Canada, France, United
    States, United Kingdom and Norway.................................................................32
Figure 5-3 Oil Consumption per unit of GDP (OECD=100).........................................32
Figure 5-4 The Annual Growth of Oil Supply and Demand from 1995 to 2005............35
Figure 5-5 The Average End-Use Price for Gasoline from 1993 to 2004 in US$...........39
List of Tables

Table 3-1 The Typical Content of the Release on the Oil Market Report in IEA……….11
Table 3-2 The Summary of World Oil Supply and Demand in Oil Market Report…….12
Table 3-3 Analysis of IEA’s Announcement Sample by Category…………………………14
Table 3-4 Data Description for Japan, Canada, France, the United States, the United
   Kingdom and Norway………………………………………………………………………14
Table 4-1 The Main Stock Market Index for Each Country…………………………….19
Table 5-1 Analysis of Abnormal Returns and Cumulative Abnormal Returns for the
   Complete Sample of IEA’s Announcements on Brent Crude Futures, Oil
   Industry Indices and Stock Prices of Oil Companies in Six Countries………………….22
Table 5-2 Analysis of Abnormal Returns and Cumulative Abnormal Returns for Oil
   Supply Change in Non-OPEC Countries of IEA’s Announcements on Brent
   Crude Futures, Oil Industry Indices and Stock Prices of Oil Companies in Six
   Countries………………………………………………………………………………….25
Table 5-3 Analysis of Abnormal Returns and Cumulative Abnormal Returns for Oil
   Demand Change in North America of IEA’s Announcements on Brent Crude Futures, Oil
   Industry Indices and Stock Prices of Oil Companies in Six
   Countries………………………………………………………………………………….27
Table 5-4 Analysis of Abnormal Returns and Cumulative Abnormal Returns for Oil
   Demand Change in China of IEA’s Announcements on Brent Crude Futures, Oil
   Industry Indices and Stock Prices of Oil Companies in Six Countries………29
Table 5-5 Analysis of Empirical and Significant Samples for Individual Company
   in Japan, Canada, France, the United States, the United Kingdom and

VI
Norway..................................................................................................................33

Table 5-6 Cross-Sectional Analysis of Cumulative Abnormal Returns Measured over

【-1 to +1】for IEA’s Announcements Using Pooled Data .................................36

Table 5-7 Cross-Sectional Analysis of Cumulative Abnormal Returns Measured over

【-1 to +1】for IEA’s Announcements in Japan, Canada, France, the United

States, the United Kingdom and Norway...............................................................37
