

Contents

Chapter 1	Introductions	1
1.1.	What Does Asset Securitization Means?	2
1.2.	Collateralized Debt Obligations.....	3
1.2.1.	Synthetic CDOs	4
1.3.	Credit Default Swaps	5
1.3.1.	Credit Default Swaps Index	5
Chapter 2	Literature Review	8
2.1.	Binomial Expansion Technique (BET).....	8
2.2.	Copula Model.....	9
2.3.	One Factor Copula Model.....	9
2.4.	Normal Inverse Gaussian Distribution.....	11
2.5.	Closed Skew Normal Distribution	11
Chapter 3	One Factor Double NIG Copula Model for Pricing CDOs..	13
3.1.	The Loss Distribution and Fair CDO Premium	13
3.2.	Copula Method.....	15
3.3.	One Factor Copula Model.....	17
3.4.	Main Properties of the NIG Distribution	18
3.5.	LHP Approximation in the One Factor Double NIG Copula Method	21
Chapter 4	One Factor Double Mixture Distribution Copula Models for Pricing CDOs.....	24
4.1.	The Introduction of Closed Skew Normal Distribution.....	24
4.2.	One Factor Double CSN Copula Model	29
4.3.	One Factor Double Mixture Distribution of NIG and CSN Distribution Copula Model.....	34
Chapter 5	Numerical Results: Pricing the DJ iTraxx	36
5.1.	Price iTraxx Tranches with the Four Models.....	36
5.2.	The Loss Distributions for Four Models.....	38
5.3.	Comparison of the Compound and Base Correlation	41
5.4.	Conclusion	43
References		45
Appendix		48

Figure Contents

Figure 1: The classification chart of asset securitization.	3
Figure 2: The structure of CDOs.	4
Figure 3: The structure of synthetic CDOs.	5
Figure 4: The flow chart of credit default swaps	5
Figure 5: The Normal inverse Gaussian distribution with different shape and skewness parameters	19
Figure 6: This figure shows that when the shape parameter increases the steepness of the density increases monotonically.....	20
Figure 7: Closed skew normal distribution with different scale parameters	25
Figure 8: Closed skew normal distribution with different shape parameters	25
Figure 9: The densities for A_i s.....	31
Figure 10: The density function for three different levels of σ_1^2	35
Figure 11: The cumulative loss distributions produced by the four models with the parameters given in Table 4.	39
Figure 12: The densities for four loss functions with the parameters given in Table 4.	39
Figure 13: The difference between densities for three loss functions and Gaussian densities.....	40
Figure 14: Densities of asset returns.....	40
Figure 15: The implied compound correlation curve for iTraxx Europe series 5 based on different copula models at 23-June-2006.....	42
Figure 16: The implied base correlation curve for iTraxx Europe series 5 based on different copula models at 23-June-2006.....	43
Figure 17: The implied compound correlation curve for iTraxx Europe series 5 based on different copula models at 12-April-2006.....	48
Figure 18: The implied base correlation curve for iTraxx Europe series 5 based on different copula models at 12-April-2006.....	49

Table Contents

Table 1: The main credit default indices in derivatives markets.....	7
Table 2: CDS index tranche spread and base correlation quoted in market – June 23, 2006.....	7
Table 3: Pricing the iTraxx Europe tranches with the LHP assumption based on different copula models at 12-April-2006.....	37
Table 4: Pricing the iTraxx Europe tranches with the LHP assumption based on different copula models at 23-June-2006.....	37
Table 5: The implied compound correlation for each tranche of iTraxx Europe based on different copula models at 23-June-2006.....	41
Table 6: The implied base correlation for the iTraxx Europe tranches based on different copula models at 23-June-2006.....	42
Table 7: Pricing results by one factor double CSN copula model with different combinations for μ_A and D_A at 12-April-2006.	48
Table 8: The implied compound correlation for each tranche of iTraxx Europe based on different copula models at 12-April-2006.....	49
Table 9: The implied base correlation for the iTraxx Europe tranches based on different copula models at 12-April-2006.....	49
Table 10: Pricing the iTraxx Europe tranches by one factor double mixture distribution copula model with different proportion at 12-April-2006.....	50
